Subject: RE: Meetups this week with: Portland/Vancouver Sierra Club Outings & Events Members, awesome people, Hikers, and others

Hello Greg,

We are looking forward to this Thursday and talking with members. Joining us will be Matt McClincy from Oregon Department of Environmental Quality (ODEQ). EPA and ODEQ partner on the Portland Harbor cleanup. EPA is responsible for cleanup of contamination already in the river sediment and ODEQ is responsible for preventing land based sources of contamination from entering the River. Matt's office recently completed an impressive docu-video on Portland Harbor which includes aerial views of the site taken by drones. The video chronicles Portland Harbor history and ODEQ cleanup actions along the river.

We would like to have a mini premier of the video starting around 6:15pm while people are enjoying bites to eat. The video would run until 6:45pm, then a discussion until 7pm, then move into the EPA interactive workshop on Superfund and Portland Harbor to conclude around 8:15pm- this would include discussion.

Let me know your thoughts.

Alanna

Hi Greg, again we appreciate the discussion and input from the Sierra Club. I would like to keep the Club looped into future events. There will be a community café in the near future to discuss priorities and community values centered around the river. Would be great to have a representative from Sierra Club assist with ideas/planning the event.

I will be in contact with those listed below for the student presentation. Thank you for the referrals.

Alanna,
People to reach at PSU are J. Alan Yeakley <yeakley@pdx.edu>, Director and Professor of the Department of Environmental Science; Jeffrey Gerwing <jgerwing@pdx.edu>, Associate Professor; and Elise Graneke <graneke@pdx.edu>, Associate Professor. The Sustainability Leadership Center are Heather Spalding <hspalding@pdx.edu>, Outreach Coordinator; and Devin Byrne <bdevin@pdx.edu> Volunteer Coordinator.

My thanks to you, Kristine, and Matt for coming to the Sierra Club's Third Thursday last evening and providing us with an informative and interactive session on the Superfund Site.
